Subject: Planning Application10/05199/EFUL

Application number: 10/05199/EFUL

Address Of Proposal: Stowey Quarry, Stowey Road, Stowey, Bristol, Bath And North East Somerset, BS39 5UJ

Proposal: Restoration of Stowey Quarry by landfilling of Stable Non Reactive Hazardous Waste (SNRHW) including asbestos and inert wastes and that the application is accompanied by an environmental statement.

Chew Stoke Parish Council Object to this application on the following grounds:

1. The Valley wide road infrastructure is wholly inadequate to cope with the huge increase in HGV traffic in the area. This will lead to increased traffic problems including congestion and a wholly unacceptable increase in noise and air pollution within the conservation areas, AONB and green belt.
2. The long term harmful consequences of dumping large quantities of hazardous waste in a quarry above a major reservoir supplying drinking water to the surrounding area and Bristol are not understood sufficiently. This makes this site wholly unsuitable for this purpose.
3. The disposal of this quantity of asbestos will require it to be imported from large areas of the UK. This is in contravention of the Council's localism policy for waste disposal and increases the risk of this type of disposal due to the vehicle miles that the material will have to travel before reaching the quarry site.

Carol Wood
Clerk to Chew Stoke PC
